

# Cell Phone Holder for the Samsung Galaxy S8 © Jo Black June 2018

(These work for my widest belt which is 1.25 inches wide)

Dimensions:  
148.9 x 68.1 x 8.0 mm  
5.86 W x 2.68 L x .32 inches

- ❖ 9 inches wide x 7.25 inches high (1 fashion fabric & 1 lining fabric)
- ❖ Self-fabric belt loops = 4 inches x 10 inches or 1-inch wide x 10 inches Webbing fabric
- ❖ Design area for embroidery must fit inside a 100mm hoops; center design in the center of the fashion fabric, if applicable.

(There will only be one seam & it is the center back seam of cell phone holder to reduce the bulk at side seams.)

1. Self-fabric Belt Loops: Create self-fabric belt loops. Cut in half and sew 1.25 inches from the back (center) seam edge (see graphic below)
2. Sew lining to fashion fabric (13mm or 1/2 inches) at the top edge (right sides together); press.
3. Fold entire thing in half, length wise (it will be approx. 17 inches long) right sides together.
4. Measure and mark 3 5/8 inches from center fold
5. Sew on marked line. Trim seam to approx. half inch & press seam using the sleeve board or a point presser
6. Press cell phone holder flat (right sides together) so that the back seam is centered in the back.
7. Pin & sew bottom edge of fashion fabric (13mm or 1/2 inches). Trim corners; flip right side out. Use "corner tool" to create perfect corners.
8. On the lining piece, fold under 13mm & using a straight stitch, sew the bottom edge closed (wrong sides together) close to the fold. Slip inside of holder & crest fini!
