

My Notes for Creating Square bottoms for totes and bags:

Sew side seams & if applicable, the bottom seam (right sides together).

Before pressing the seams open, draw across from side to side (on both sides) using this formula:

For a 6-inch squared bottom, measure 3 inches (if you have a bottom seam sewn, measure from the line of sewing).

For a 5-inch squared bottom, measure 2 ½ inches (same as above for a bottom seam...)

Basically, you measure and mark ½ of what you want the square bottom to be.

See Step 5 of this pdf for instructions on how to fold the fabric:
